Game Review Speaking of storytelling, Infectorator 3 is a very minimalistic story that basically revolves around zombies hoping to take over the world simply because of what zombies do. The original game loop for the game is very simple, at the beginning of each level, the player selects the field to place his first zombie, which then automatically track uninfected people, turning them into zombies as soon as they can reach them. The more people who become infected, the more zombies that appear at the level and the closer the player gets to get a successful result on that level. Over time, zombies slowly run out of time and de-spawn or get killed by a few few people who can actually defend themselves. When all zombies are defeated or all people have turned into zombies, the level will end and all rewards will be delivered, depending on how well the zombies did in general. By the end of each level, the player is rewarded as coins that can be used to purchase support items and upgrades to their zombies, which will make them more powerful. There are many different types of zombies in this game, and the only real way to get them is through a system called breeding. By breeding some zombies together, the player can create a special zombie that has its own set of strengths or abilities that no other zombie is available, making it easier to win certain levels. Aesthetically, the game uses pixel art style to keep the experience as bright and vibrant as possible, but having a rather appealing look to it. At first glance, visual styles could be confused with what's provided to the younger crowd/audience, but the simplistic nature of it all allows the player to be aware all the time about what they need to do. In terms of comparisons, the game pulls a lot of inspiration from popular zombie movies and video games, but manages to maintain its unique style of gameplay, which is not really like much else in the market. With that in mind, it gives Infectorator 3: Apocalypse its charm and charisma, which might not be seen in others This unique style of play makes for a fun and endearing arcade game, which is unlike many other zombie games where the player is usually stuck with a gun in his hand and ordered to go and shoot. Instead, the player is treated to a carefree zombie game that does not take himself too seriously. Infectorator 3: Apocalypse Infectorator 3: Apocalypse is a mix of action and strategy.
