Now, I like it still. Type. One thing to note is ripoff with Nintendo's Mario Games. Nintendo is much better. But the fact that this game exists on the hardware of phones is quite impressive. Graphics and beautiful beautiful The game really went on. But the game glyphs, often with ads appearing in the middle of the level and killing you. The design level is awful and each level feels like a repetition of the latter. But most importantly, it's not so much fun. However, I still highly recommend this game. You will probably end up removing it, but it offers some fun and is incredibly good for the phone name. If you liked Lep's World 1 or 2, it's a must buy. Many flaws make it a waste of time, but the effort made in this game keeps it enough for me to give it 3/5. Ok, so I played this game for the past week or so and I got a World VII card. That's where it starts going down. There's literally fireballs everywhere and I can't get through at all. Design is not so good. Fireballs fill the map and it's literally impossible for me to get through. I'm not trying to brag at all, the creator of this game knows a lot more about this game more than I do, of course. But I've played it a lot and the 7th card is so frustrating and it's not even fun at all. The chances of finishing the card are close to impossible. I know it's just a game, I'm not too crazy, but the 7th card wasn't designed nicely. It was just filled with so many fire balls. It's really sad that I'm not going to play this game again, given that I've played it nonse stopping for the past week or so ☹️. But overall, by the 7th card, the game was so fun that I loved it so much 😊😊😊 The developer, nerByte GmbH, pointed out that the app's privacy practices could include data processing as described below. HOW WE ARE: USA: USA: June 20, 2018 version 3.2.2 We hope you have fun playing Lep's World Plus! we update the game every few weeks, so be sure to download the latest version to get all the new features and levels! New to the game? Feel free to join in the fun! Returning after a break? About time! Let's play! :) It's a fun game, but it doesn't fit on screen with my new mobile phone. When a pop-up ad or window for buying things for the game appears, I can not click the exit button in the upper right corner because it is behind the screen. That means I can't play this game anymore. When I completely close the window and try to open it later that add it remains on the screen and I still can not play the game at all. Obviously I love the super Mario brothers and it's actually pretty darn close. Since I can't play Mario brothers on my mobile phone this is the next best thing. Plus on my iPhone Xs it looks amazing and the management is fantastic. Thank you for this game I will go through all the levels. Woot Woot I recommend this game to anyone. I got a free game initially to try I really liked it, so I bought the series because of the ads now I played about 30 minutes and the ads showed but buy things in the game but now I can't get it no matter what I do x on top not the reason the game screen is great, so I thought I'll try the other 2 games yep the same ugh now I'm stuck with 3 games I can not play! Please fix the screen so it can match what ever phone yours like iPhone 11 11 example or give me my money back because I can't play games and just wasted my money to keep looking at ads on the Developer screen, nerByte GmbH, indicated that the app's privacy practices may include data processing as described below.
